## Armstrong Maple

*Acer x freemanii* 'Armstrong'

Height: 45 feet

Spread: 15 feet

Sunlight: ○

Hardiness Zone: 4a

### Description:

A very distinctive hybrid maple with a narrow, upright growth habit, fast growing, inconsistent fall color; excellent choice for the smaller home landscape or for articulation, tends to broaden with age

### Ornamental Features

Armstrong Maple features showy clusters of red flowers along the branches in early spring before the leaves. It has green foliage throughout the season. The lobed leaves turn outstanding shades of yellow, orange and red in the fall. The fruit is not ornamentally significant. The furrowed gray bark and brick red branches add an interesting dimension to the landscape.

### Landscape Attributes

Armstrong Maple is a deciduous tree with a narrowly upright and columnar growth habit. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and can be pruned at anytime. It has no significant negative characteristics.

Armstrong Maple is recommended for the following landscape applications;

- Accent
- Shade
- Vertical Accent

### **Planting & Growing**

Armstrong Maple will grow to be about 45 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 6 feet from the ground, and should not be planted underneath power lines. As it matures, the lower branches of this tree can be strategically removed to create a high enough canopy to support unobstructed human traffic underneath. It grows at a fast rate, and under ideal conditions can be expected to live for 80 years or more.

This tree should only be grown in full sunlight. It is quite adaptable, preferring to grow in average to wet conditions, and will even tolerate some standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
